Product feature

REPREVE is the world's number one brand of recycled performance fiber. Our high-quality fibers are made from 100% recycled materials, including post-consumer plastic bottles and pre-consumer waste. They are also certified and traceable.

REPREVE brand to foster a sustainable world by diverting plastic bottles—billions of them—from landfills and oceans. We also collect and reuse industrial waste, starting with our own.

REPREVE helps to offset the use of petroleum, emitting fewer greenhouse gases and conserving water and energy in the process.

REPREVE fiber to add benefits like comfort, protection, and durability. Blending **REPREVE** with performance technologies means there's no reason to make sacrifices when using sustainable yarn.

Recycling more than 15 billion plastic bottles, and we're aiming for 20 billion bottles by 2020!.

Product feature Organic Cotton

Environment-Friendly: It results from an agriculture and environmental friendly method. Producing organic cotton uses lower carbon due to lesser fuel and energy consumption. Because it goes through a chemical free production process, it also prevents water contamination.

Safety Standards : Organic clothing products are safer as manufacturers adhere to very rigid and stricter manufacturing standards

Avoid Allergies and Skin Concerns : There are no chemical retentions from organic cotton clothing; thus, people with allergies or with specific chemical sensitivity will greatly benefit from using organic cotton in clothing fabric. It feels better on your skin too even if you are not suffering from allergies or chemical sensitivities.

REFIBRA (PCW COTTON TENCEL BLEND)
No loss in quality of the product due to chemical recycling process of fibers with REFIBRA™ Technology.
The certified bio-based fibers are manufactured in an environmentally- responsible production process. The fibers are certified as compostable and biodegradable and thus can fully revert back to nature.
TENCEL™ fibers with REFIBRA™ technology are identifiable in yarns, fabrics and -final garments due to the special identification technology designed to confirm fiber origin.
 The recycling of cotton waste fabrics into virgin textile TENCEL™ fibers offers a practical solution to enable circular economy in the apparel industry. That's how we are working for a better world..
