Article ref	ND-7377
Composition	77.4% Cotton 7% Viscose (Ecovero) 14.4% Poly 1.2% Lycra
Color	Indigo
Weight	10.0 oz (BW)
Width	55/56-
Stretch	37% (+5)

Product feature

#Ecovero™ Viscose fibers are derived from sustainable wood and pulp, coming from certified and controlled sources.

#Lenzing ECOVERO™ fibers have been certified with the EU Ecolabel as meeting high environmental standards throughout their life cycle: from raw material extraction to production, distribution and disposal.

Article ref	ND-10189A
Composition	47.5% Cotton 34% Viscose 16.5% Hemp 2% Spandex
Color	Indigo
Weight	9.75 oz(BW)
Width	55/56

Product feature

Hemp one of the fastest growing plants and it doesn't need much water, energy, pesticide, or fertilizers. The plant is very good for soil, it can be grown for many years in the same place without exhausting it. This is why hemp is considered to be eco-friendly.

Hemp has very similar properties to linen. They are often difficult to differentiate.

However, as hemp belongs to the same family as cannabis (although it does not have the same psychoactive effects), growing hemp is heavily regulated or prohibited in many countries.

Product feature

Recycle Linen

Linen is a natural fiber which stems from the flax plant. It uses considerably fewer resources than cotton or polyester (such as water, energy, pesticides, insecticides, fertilizers). # Flax can grow in poor soil which is not used for food production. In some cases, it can even rehabilitate polluted soil. Flax plants also have a high rate of carbon absorption.

For these reasons, we consider linen to be a sustainable material, even when it is not organically grown.

REPREVE is the world's number one brand of recycled performance fiber. Our high-quality fibers are made from 100% recycled materials, including post-consumer plastic bottles and pre-consumer waste. They are also certified and traceable.

REPREVE brand to foster a sustainable world by diverting plastic bottles—billions of them—from landfills and oceans. We also collect and reuse industrial waste, starting with our own.

REPREVE helps to offset the use of petroleum, emitting fewer greenhouse gases and conserving water and energy in the process.

REPREVE fiber to add benefits like comfort, protection, and durability. Blending REPREVE with performance technologies means there's no reason to make sacrifices when using sustainable yarn.

Recycling more than 15 billion plastic bottles, and we're aiming for 20 billion bottles by 2020!.
